

## French Variety Camp

The FRENCH VARIETY CAMP at our Maplehurst Campus is designed to prepare and support children for our French Immersion program or for learning French as a Second Language. Our French Instruction classes, along with various other summer activities, promote French in a fun and relaxed setting. All activities are presented in French except for gym, yoga, dance and chess.

### Programs:

Indoor & Outdoor Sports	Drama
Visual Arts	Science & Cooking
Yoga & Dance	Chess

Please select your choice of specialty camp and campus on your application form.

Why not try a different campus?!

## Martial Arts + Science & Art

**MARTIAL ARTS** are a fun way for students to achieve fitness and focus. They will gain discipline, self-confidence, and learn about leadership and teamwork - skills that help them throughout their lives. Get fit, have fun, learn martial arts!

With **SCIENCE**, fun and learning happen through active involvement, experiments, investigation and discoveries. Students will be asking questions, probing for answers, and trying to understand the world around them through Science.

In **ART**, students will be encouraged to think creatively, observe, describe, analyze and interpret, as well as express their feelings through art. They will be given creative freedom to express their artistic side with the support and techniques necessary to complete each project.

## Badminton & Tennis + Chess & Gymnastics

Summer sports allow students to indulge their love for athletics while enjoying the company of their peers and having a great time. The focus is on developing required skills and providing drills to give our campers instruction in the techniques and tricks to improve their performance. This session the focus will be on **BADMINTON & TENNIS**.

**CHESS** is a fun game that enhances your child's thinking capability, and at the same time improves visual memory and concentration. Chess teaches them planning, strategizing and develops logical thinking and other life skills. Students will learn basic chess skills and some advanced strategic skills.

**GYMNASTICS** is a great way for children to develop and advance their abilities. Gymnastics not only strengthens muscle groups, but also improves coordination and flexibility. Students will be doing lots of flips, twists and maybe some cartwheels!

## Basketball + Coding & Drama

Summer **BASKETBALL** allows children to indulge their love for the sport while enjoying the company of other children and having a great time playing a variety of indoor and outdoor games. The focus is on developing skills and providing drills, giving our campers the techniques and tricks to improve their performance. With a focus on BASKETBALL, students will not only improve their play, but also practice sportsmanship and learn to interact more positively with others.

Digital literacy (**COMPUTER CODING**) is the new essential skill for the 21st century. Our young programmers will use MIT's innovative Scratch visual programming tool to code their own interactive stories, games, and animations. This will encourage them to think creatively, reason systematically, and work collaboratively.

Research reveals the positive impact of **DRAMA** on a child's physical, emotional, social and cognitive development. Students will have the opportunity to explore their creativity and self-expression, gaining self-confidence in their ideas and abilities.

## Taekwondo + STEM & Dance

Get fit, have fun, learn Olympic style **TAEKWONDO**. Students will enhance their self-esteem by heightening their physical and mental powers. Through Taekwondo, students will gain discipline, control, and leadership.

**STEM** explores ideas in Science, Technology, Engineering and Mathematics – through a hands-on interdisciplinary and applied approach. Students will be studying, building, and creating structures and models such as bridges, and learning how robotics and technology can affect all these areas. STEM integrates the 4 subjects into a fun & cohesive learning paradigm based on real-world applications

The **DANCE** class gives campers an experience with many forms of dance including jazz, hip-hop, modern and musical theater. Our trained dance teacher allows campers to develop and explore their abilities and learn new techniques. Children will build core strength, keep rhythm and have lots of fun!
