

Please select your choice of specialty camp and campus on your application form.

MAPLEHURST CAMPUS (MC):

Session 1 ► June 30 - July 11

Morning: Music Making, Drama

Afternoon: Basketball

Session 2 ► July 14 - 25

Morning: STEAM, Cooking/Gardening

Afternoon: Tennis/Multisports

Session 3 ► July 28 - Aug. 8

Morning: Basketball

Afternoon: Creative Arts, Digital Animation

Session 4 ► Aug. 11 - 22

Morning: Soccer

Afternoon: 3D Art, Coding

YORK MILLS CAMPUS (YC):

Session 1 ► June 30 - July 11

Morning: Basketball

Afternoon: STEAM, Cooking/Gardening

Session 2 ► July 14 - 25

Morning: Soccer

Afternoon: Music Making, Drama

Session 3 ► July 28 - Aug. 8

Morning: Little Architects, Creative Arts

Afternoon: Basketball

Session 4 ► Aug. 11 - 22

Morning: Coding/Robotics, Science & Arts

Afternoon: Tennis/Multisports

Note:

- French Variety Camp is available at the Maplehurst Campus only.
- Students from the Thornhill Campus may join programs at either York Mills or Maplehurst Campuses.

SUMMER DAY CAMP 2025

*The perfect balance of
physical, mental
and creative challenge!*

STEAM

STEAM explores ideas in Science, Technology, Engineering, Arts and Mathematics – through a hands-on interdisciplinary and applied approach. Students will be studying, building, creating structures and models such as bridges, and learning how robotics and technology can affect all these areas.

DRAMA

Research reveals the positive impact of **DRAMA** on a child's physical, emotional, social and cognitive development. Students will have the opportunity to explore their creativity and self-expression, gaining self-confidence in their ideas and abilities.

Music Making

Music Makers at camp is an exciting theme where children dive into the world of music through playing instruments, singing, dancing, and exploring all aspects of rhythm and melody. It encourages self-expression, teamwork, and a love for rhythm, melody, and movement.

The **FRENCH VARIETY CAMP** at our Maplehurst Campus is designed to prepare and support students for our French Immersion program or for learning French as a Second Language in a fun and relaxed setting. Students will be engaged in French instructional activities, crafts and games for half of the day, with various specialty summer activities such as sports, science, etc. conducted in English for the remainder of the camp day.

Digital Animation

Join our exciting digital animation camp. Learn to bring your favourite characters to life through fun, hands on activities using various computer software. Unleash your creativity and make your own animated stories.

TENNIS

This program's focus will be on teaching the skills and techniques needed to play **TENNIS**. It also allows students to indulge their love for athletics while enjoying the company of their peers and having a great time.

GARDENING / COOKING

GARDENING program is both productive and fun! It allows students to engage all their senses and develop skills including: Responsibility: from caring for plants. Understanding: (e.g., plants wilt without water, weeds compete with plants), they develop a deeper understanding of the natural world. "Self-confidence: from achieving their goals. **COOKING** lets students enjoy their creations while building creativity, problem-solving, and critical thinking skills.

LITTLE AUTHORS

This fun and engaging class teaches students how to develop their writing skills and put their amazing ideas on the page. Students will learn to create a story with twists and turns and develop a plot. They will get a taste of the entire writing process from start to finish. they will read and discuss examples.

SCIENCE & ART / 3D ART

Students will be asking questions, probing for answers, and trying to understand the world around them through **SCIENCE**.

In **ART**, students will be encouraged to think creatively, observe, describe, analyze and interpret, as well as express their feelings through art.

In **3D ART**, student will use various materials manipulated into creative works to produce art with all the dimensions of height, width, and depth.

CODING / ROBOTICS

COMPUTER CODING is an essential skill for the 21st century. Our young programmers will use MIT's innovative Scratch visual programming tool to code their own interactive stories, games, and animations. Student will also use science, engineering and technology to learn about **ROBOTICS**.

MULTISPORTS & SOCCER

MULTISPORT classes allow our elementary students to enjoy a diverse range of sports activities and learn the elements of a wide variety of sports. **SOCCER** drills, practice, and games give students the skills needed to become Soccer superstars.

LITTLE ARCHITECT

This class is built around interesting, creative and fun activities for introducing architecture to elementary students. The class is conducted by an architect and some of the activities the students will participate in are: Cutting cubes in different shapes and painting them, then drawing the isometric on grid sheets; Drawing diagrams and changing them to floor plans; Creating a neighbourhood and its needs as a group project.

BASKETBALL

The focus of our **BASKETBALL** classes are on developing skills and providing drills, giving students the techniques and tricks to improve their performance. Students will not only improve their play, but also practice sportsmanship and learn to interact more positively with others.
