LEADERSHIP CAMP

Pre-teen & Teen (Ages 11-14)

York Mills Campus
 July 6-17, 2026

LEADERSHIP SKILLS

Through lessons & activities, campers will develop communication, teamwork, active listening, critical thinking, decision making, problem solving, organization, self-awareness, initiative, empathy, responsibility, and the ability to delegate tasks, all while demonstrating positive social skills and ethical behavior.

PROGRAM

- Public speaking
- Interview skills
- Cooperative & trust building activities
- Community outreach

KNOWLEDGE

Empowering youth to be leaders will: Grow their self-confidence. Leadership skills can boost their self-esteem and motivation to work hard at a goal or try new things. Campers will also strengthen their sense of control and self-identity. They'll learn to recognize their own needs and speak up. Learning how to plan, problem solve and implement solutions allows youth to see what factors drive success. When they're taught to believe that their perspective matters, they'll be more motivated. They'll build essential employability skills that lead to success in school and the workforce. They will work on problem solving, these skills will prepare them for life beyond high school.

ROBOTICS & AI

Real Programming 4 Kids is an independent coding company that will be part of the program. On a daily basis, campers will learn that coding is more than just a skill—it's a powerful tool that empowers children to think creatively, solve complex problems, and prepare for a future brimming with technological innovation. This coding program will offer a unique and enriching learning environment designed to help your child:

PROGRAM

- Develop Essential 21st-Century Skills
- Discover the Fun in Math
- Build an Engineering Mindset
- Gain an edge in STEM

KNOWLEDGE

Campers will receive personalized guidance and support from expert instructors. Campers will cultivate critical thinking, problem-solving, and logical reasoning abilities, which are crucial for success in any field. Foundational math concepts such as vectors, integers, and trigonometry will be taught through engaging game development projects. Campers will to approach challenges methodically, test hypotheses, and find solutions, all while working on exciting coding projects. Early exposure gives your child a step ahead as they progress through school and beyond.

BASKETBALL

Coach Joe will be running a speciality basketball & sports program. His program will develop athletic ability, and enforce team building skills.

PROGRAM

- Skills & Drills
- Endurance
- Cooperation

KNOWLEDGE

Students will develop life skills such as; Self-confidence, decision-making, and adaptability. This can also help with emotional regulation, learning to manage stress and stay calm. Sports can also help develop social skills like conflict resolution, negotiation, and time management. It also develops individual skills of perseverance and accountability.
